**Your guide to family-friendly summertime
fun in Mitchell and Yancey Counties**

This resource was developed, in part, under grant number 5NH28CE002727-07-00 from Department of Health and Human Services, Centers for Disease Control and Prevention. The views, policies, and opinions expressed are those of the authors, and do not necessarily reflect those of CDC or DHHS.

Dear Families,

Do your kids sit around the house complaining they have nothing to do in the summer? Do you struggle to find affordable and fun summer activities for your children? Do you run out of ways to keep your kids entertained in the summer? Then this guide will make your summer better!

Our community has many FREE or low-cost family-friendly activities throughout the summer and the Summer Resource Guide has all the details! In this guide, you will discover summer activities from a variety of local organizations – and there are enough activities to keep your children busy, engaged, and having fun all summer long.

The best part about your children being involved in community summer activities is that they not only keep kids from being bored, but also help them build stronger family relationships, learn social skills, establish positive connections to their community, and build relationships with other caring adults outside of the family. These relationships and skills gained through community activities help children to be healthier, happier, and more successful as they grow.

We hope you will find this Summer Resource Guide to be useful as you make plans for summer! For more community information and resources, check out our website at: pathwnc.org. And remember... the Yancey Transportation Authority (682-6144) or Mitchell Transportation Authority (688-4715) are **happy to help with transportation needs during the summer months.**

Best wishes for an amazing summer,

Your Friends at PATH

SALT MAKING DEMONSTRATION

Saltville, Virginia, has a rich history of salt production dating back to prehistoric times. Located in the Appalachian Mountains, the area was naturally endowed with abundant salt deposits. During the Civil War, Saltville became a strategic location due to its salt production, which was crucial for preserving food for the Confederate army. After the war, the salt industry continued to play a vital role in Saltville's economy. The process involved drilling wells to reach the brine, which was then brought to the surface and evaporated in large pans to produce salt. This method remained in use until the early 20th century when the industry declined due to competition and the advent of refrigeration. Today, Saltville celebrates its heritage with historical markers and museums, preserving the story of its salt-making past and its impact on the region's development. Join world renowned saltmaker, Jim Bordwine, and learn all about the history of Salt Making.
